**Accounting** - this is absolutely essential to any company and outsourcing it can be cost-effective when trying to run a lean operation.

**Digital Marketing** - this can arguably take up the most time, depending on how much effort you want on marketing efforts and outsourcing, if done properly, can be more effective and efficient than in-house. SEO and email automation efforts are two of the key tactics used here.
Human Resources - staying on the right side of the law and keeping employees happy requires an HR department. With affordable HR agencies available for outsource, more companies are choosing this option.

Sales Development - B2B businesses need outbound strategies if they want to be successful and outsourcing this tactic can lead to hyper-targeted lead generation. Having a company or outsourced team filling your funnel while 1 or 2 manage processes in-house can be very valuable and effective for sales.
